HEALTH

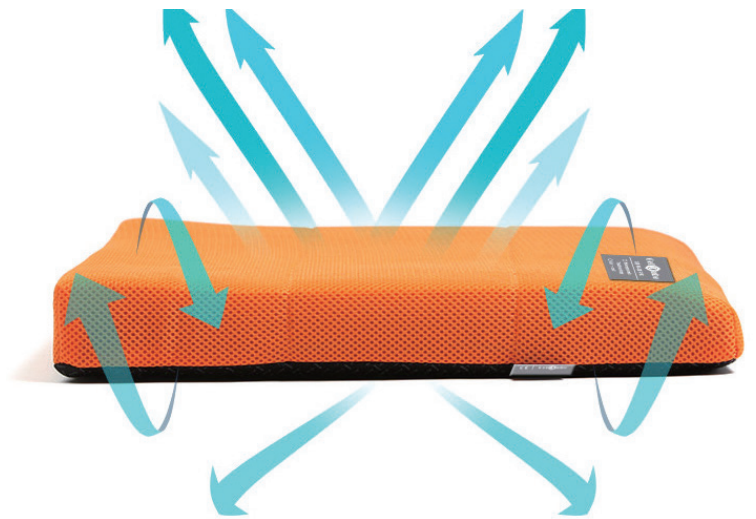

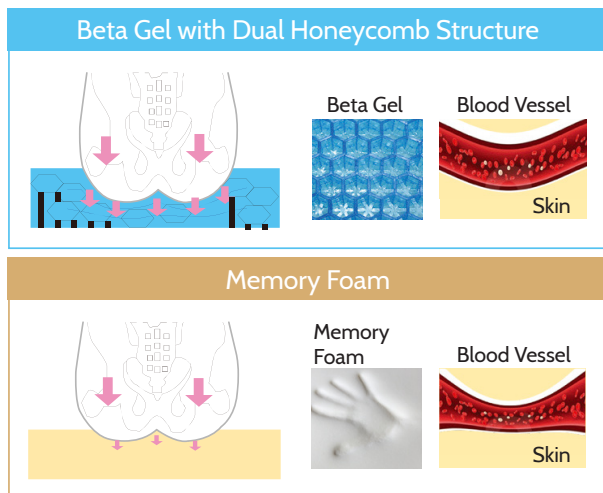

GelComfort with dual 3D Honeycomb and Air-Cell Beta Gel technology.

All day comfort.

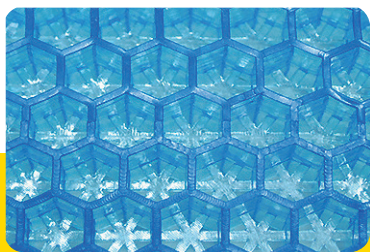

GelComfort

Featuring patented dual 3D Honeycomb and Air-Cell Beta Gel technology, the GelComfort cushion provides a new level of comfort. The dual honeycomb design creates excellent pressure distribution, dispersing pressure on areas prone to discomfort and pressure sores, such as the hips and thighs, and assisting good blood flow.

The 3D Honeycomb design redistributes weight and pressure whilst providing stability and support. Weight is more evenly distributed than with Memory Foam and other kinds of cushion materials.

GelComfort prevents the build up of pressure in prone areas, ensuring that blood vessels and skin are not compressed or compacted when sitting. Extended periods of sitting in these conditions can lead to pressure sores, skin tears and ulcers.

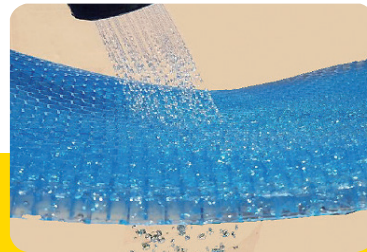

3D Honeycomb Air-Cell Technology

Patented technology improves on memory foam and latex thanks to greater stability provided through a cell wall structure, preventing buckling and compression.

Beta Gel composition

Beta Gel is made from skin-safe oils, special polymers and gel elastomers, which provide excellent pressure distribution and superior elasticity. Beta Gel protects skin and encourages optimal blood flow through its dispersion of pressure.

Easy to clean with water

The GelComfort cushion is designed so it can be easily cleaned for continued use. The gel insert can be washed at temperatures up to 50 degrees, while the fabric cover can be machine washed.

Air-Cell Beta Gel keeps the cushion cool and ventilated

Each Air-Cell discharges warm air and absorbs fresh air with body's movement to ventilate the cushion.

Product Information

Model Codes:

Large (single layer): XCM-GC-L1
 Large (dual layer): XCM-GC-L2
 Extra Large (dual) : XCM-GC-XL2

Dimensions:

L1: 460 x 420 x 25mm
 L2: 460 x 420 x 50mm
 XL2: 550 x 500 x 50mm

Material:

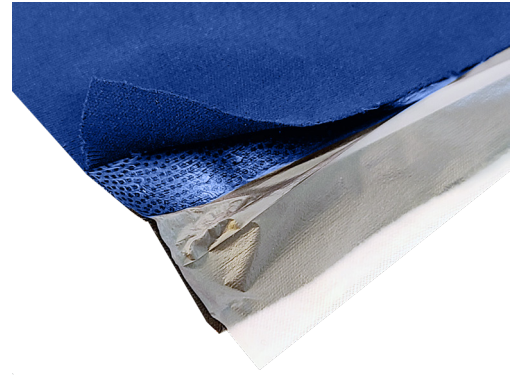

Cover: Polyester 100%
 Gel: Polysiloxanes 100%

Notice: all products, product specifications and data are subject to change without notice to improve reliability, function, design or otherwise

GelComfort

4-Way Stretch Waterproof Cover

The optional 4-Way Stretch Waterproof Cover is constructed using the same technical fabric as our pressure care mattresses, making it perfect for use in a clinical setting.

Cover fabric structure

Features

- Excellent stretch - reduces 'hammocking', and lowers interface pressure
- Breathable and vapour permeable - ensures that the GelComfort cushion can offer full clinical benefits.
- Waterproof barrier fabric - prevents the ingress of fluids and ensures care staff can wipe-clean easily

Technologies

- Antibacterial and antimicrobial - inhibits bacterial growth as well as fungus, mould and mildew
- Flame retardant standard CAL117
- High performance stretch material ensures pressure care outcomes are delivered

Cover composition

- 100% polycarbonate polyurethane (PU) coating
- 4-way stretch 100% nylon weave backing
- Water resistance/hydrostatic pressure(mm):2000/mm/24hrs
- Moisture permeability(g/m²/24hrs): 500g/m²/24hrs

Cover cleaning

- Cover removable, waterfall zip
- Machine washable cover to 95 degrees
- Low to medium spin speed
- Hang or dry flat, or use drying cabinet
- Clean by 75% ethyl alcohol or neutral PH7 detergent

Product Specifications - GelComfort Waterproof Cover

Model Codes - with waterproof cover
Large: XCM-L2-COVER-PU-BLU
Extra Large: XCM-XL2-COVER-PU-BLU

Dimensions:
L1: 460 x 420 x 25mm
L2: 460 x 420 x 50mm
XL2: 550 x 500 x 50mm

Material:
Cover: PU/Nylon 100%
Gel: Polysiloxanes 100%
